

Product Guide

FUTURE OF
BRITISH
MANUFACTURING

Welcome to Easy-Trim

The roofing and construction industry is fast paced and growing rapidly. Easy-Trim Roofing and Construction Products Ltd is both a manufacturer and distributor of the ultimate range of roofing, construction and consumable products to the industry.

Based in Altham, Lancashire, the company was founded in 2005 and has since gone from strength to strength, becoming one of the fastest growing manufacturers in the UK roofing sector. We offer innovative products of unparalleled quality and have a reputation for customer service second to none.

Now a multi-award winning company, we have made significant investment in our production facilities and in the development of our people. We strongly believe that quality, availability, reliability and innovation in the future will be derived from British Manufacturing. Easy-Trim hold industry recognized certifications and accreditations amongst which is ISO 9001- providing confidence in our product range and demonstrating our commitment to continual improvement and development.

We supply everything for the roof all under one roof. Inclusive of Underlay's & VCL's, Easy-Trim Roto Roof Windows, Dry Fix Ridge, Dry Fix Verge, Lead Replacement, Ventilation, Liquids, Bituminous Membranes, Insulation and Sealants. We aim to deliver the widest range of products of the highest quality.

Ridge F

All the components are of high quality and manufactured to make installation quick and simple.

- Ventilated ridge roll with pumped butyl for a quality seal
- Universal ridge unions compatible with almost all ridge tiles
- Super strength nylon “ratchet” clips give superior strength & durability
- Mortar free
- Resistant to wind and water
- Vapour permeable
- Simple installation requires no special tools
- Self-adhesive butyl strip provides a water tight seal & permanent bond
- High quality stainless steel fixing packs to ensure durability and long service life
- 20 year guarantee on all components

Suitable for

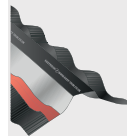

- Concrete and clay ridge tiles
- Most slate and tile profiles

Available in 3m, 6m and 10m kits

Product Colours

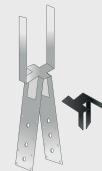

Kit Contents

Ridge Roll

- Manufactured from a polypropylene hydrophobic mesh that allows the roof to breathe whilst repelling water
- A central white fabric strip along the centre of the roll enables accurate installation ensuring a neat and aesthetically pleasing ridge line
- Corrugated aluminium allows a constant 5mm of ventilation
- A pumped butyl self-adhesive strip allows a watertight permanent bond without compromising the integrity of airflow

Ratchet Clips & Battens

- Manufactured from glass filled nylon for superior strength and durability
- Adjustable outer clips ensure our kits are suitable for use with clay tiles

Unions

- Film grade polypropylene material for durability and flexibility – will not weaken when ‘flexed’
- Incorporates uniquely designed tracks to divert any penetrating rainfall away from the ridge

Did you know?

We also sell a Hip Accessory Kit which is to be used in conjunction with Ridge F kits.
See page 2 for codes and pricing.

Ridge F Plus

All the benefits of our high quality Ridge F dry fix kits PLUS much more...

The same hydrophobic mesh ventilating ridge roll, film grade polypropylene unions PLUS:

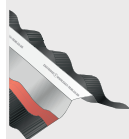

- New flat profile ratchet clips for an improved subtle aesthetic
- An increased number of ratchet teeth for a rapid and accurate installation
- Corrosion resistant stainless steel batten straps for improved stability in both hip and ridge applications, and compliant with BS5534 mechanical fix requirements
- Now available in grey, black and terracotta to match most tile colours

Available in 3m, 6m and 10m kits

The original and still the best Universal Dry Verge

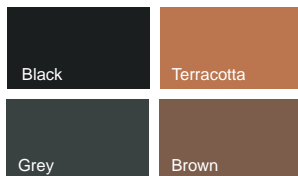

- Manufactured from polypropylene for superior flexibility and ease of installation
- Universal handed units; left & right hand pieces no longer required
- Complies with BS5534 mechanical fixing requirements
- Installation suitable in all weather conditions
- Tight secure fit, not vulnerable to wind-dislodgement
- Excellent UV and colour stability, no fading or unsightly staining on soffits
- Available in black, terracotta, grey and brown

Verge U

Easy-Trim Verge U is truly universal in that the units can be used on the left and right side of the verge, and they are fully compatible with most tile types. The unique design combines fast, simple installation with exceptional holding qualities.

Product Colours

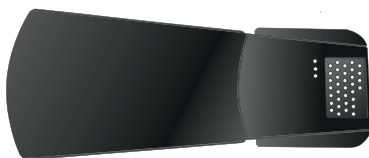

Did you know?

In conjunction with our Easy-Trim Verge U system, our ridge end caps feature innovative FlapCap Technology. Unique flexible flaps which are designed to contour around the sides of the Verge U piece create a 'sealed' unit, preventing water ingress and infestation whilst also adding to the neatly finished aesthetic.

Continuous Dry Verge

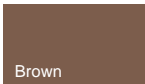

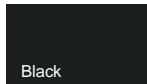

- Simple to install dry fix solution, fast and effective
- Available in black, brown and white
- Available in 5m & 6m lengths
- Manufactured in high quality, external grade, rigid upvc which is extremely resistant to light degradation and atmospheric pollution
- Saves time and labour
- Can be installed in all weather conditions
- No under-cloak required
- Available for Concrete Tile (R Type) and Slate Tiles (S Type)
- Compatible Ridge End Caps available in black, brown and white

Verge C

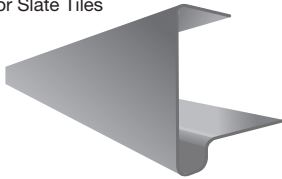

Provides a complete and continuous watertight cover for the joint between roof tiles and brick work or bargeboard, giving greater security to the verge. Continuous dry verge is a fast and effective dry fix solution, without the inconvenience of using mortar and clips, providing a maintenance free, clean and attractive finish to gable ends.

Breather Membranes

- Suitable for warm and cold roofing construction
- 3 layer thermally bonded construction vapour permeable range
- BBA certified for warm and cold roof applications BBA 10/4753
- Conforms to BS5534.2014 Annex A
- All our range is printed with a grid for simple cutting
- UV stable for 3 months
- High breathability
- LR Underlay
- Vapour permeable

Breather Membranes Range

A vapour permeable and airtight breather membrane, designed for use in both fully supported and unsupported installations in tiled or slate pitch roofs and walls.

Suitable for:

All applications on warm, cold and hybrid roofs, together with installations on Scottish sarking boards, and equally suitable for installations in timber and steel frame constructions.

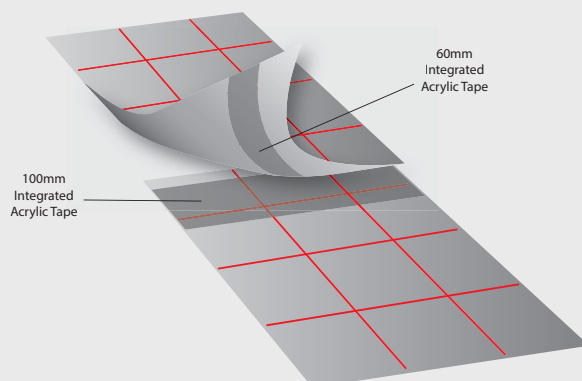

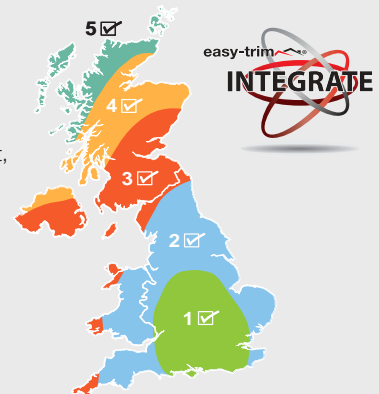

Taped Membranes

Did you know?

In addition to our popular breather range we have introduced our Integrate range of breather membranes. Integrate membranes feature high performance, integrated acrylic tapes allowing rapid installation without the need for battened overlaps. This saves on cost, time and reduces potential health and safety issues. All Integrate membranes are suitable for all 5 National Wind Zones.

- **Improved health and Safety**
No tripping hazards and simpler than retrospectively installed taped laps
- **No confusion at the counter**
Zone suitability is printed on both the inserts and membrane
- **All integrate products are suitable for all 5 National Wind Zones**

Cavity Closer

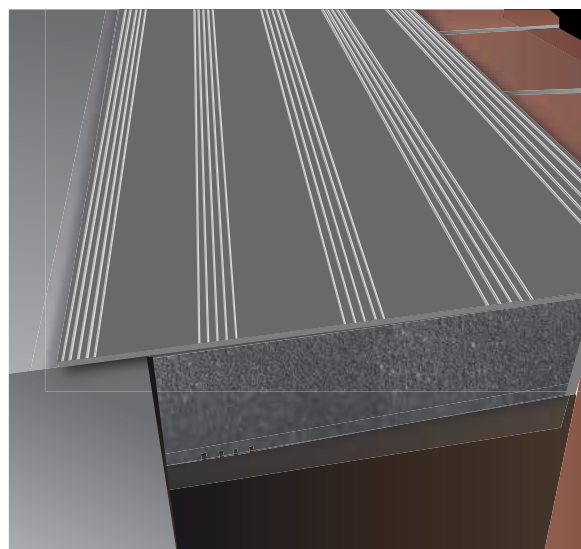

Easy-Trim Cavity Closer provides a simple and highly effective method for closing cavities around openings in masonry, timber frame and steel frame system wall constructions. Suitable for use in both new build and refurbishment.

Product Colours

Features

- Easy-Trim Cavity Closers are an easy way to achieve building regulations compliance when closing cavities where cavity widths are unknown.
- Available in 2 profiles to fit cavity widths: 50mm - 100mm and 100mm - 150mm
- Innovative multi-width design
- Easy to install with simple cut to size indicators
- Fully ridged pvc cavity closure
- Prevents cold bridging
- Suitable for use in both new build and refurbishment
- Reduces risk of condensation, mould & moisture migration across the cavity
- Can be used on timber frame constructions
- Overcomes cavity width variations
- Complies with relevant building regulations and British Standards

Weep & Peep Vents

The Weep vents have an integral grill design to prevent rain ingress during high winds and a lip to ease positioning during use. It is wide enough not to become blocked by day to day debris yet small enough to prevent access by large insects.

The Peep vents provide cavity wall drainage solutions, allowing rain water to easily escape the cavity wall via a discreet aperture in the vent.

Eaves Protection Strip

An alternative to our recycled PVC rigid eaves protection, Easy-Trim Protect is a high quality bitumen based eaves support strip that prevents roof underlay drape into the gutter.

Available in:

- 330mm x 16m
- 500mm x 16m

PRODUCT CODE	DESCRIPTION	BOX QTY
ETEP/5U/330	EAVES PROTECTION STRIP 330MM X 16M 5U FELT	90
ETEP/5U/500	EAVES PROTECTION STRIP 500MM X 16M 5U FELT	60

Can be ordered in multiples of 30 only

Tile Vents

- A simple solution to alleviate the accumulation of condensation in the loft space. All designs in our range are practical and unobtrusive with clean aesthetics.
- Suitable for high and low ventilation and also as an outlet terminal for extraction fans and soil pipe ventilation. Available in a wide range of standard colours with colour matching service also available.
- Our range of profiles are compatible with tile ranges from most UK tile manufacturers.

Pinseal
Finish

Riven
Finish

Lowline Slate Vents

Available in Pinseal (smooth) or Riven (texture slate like appearance) finish with a virtually flat 10k ventilation area to significantly reduce the risk of ventilation blockage. Suitable for pitches of 22.5° and above.

- Recommended 4mm flyscreen protection
- Fully compliant with NHBC, BS 5250:2002 and BR document requirements.

PRODUCT CODE	DESCRIPTION
ETEV/SVP/600300	LOWLINE SLATE VENT (600 X 300MM) PIN SEAL
ETEV/SVR/600300	LOWLINE SLATE VENT (600 X 300MM) RIVEN

All our tile vents are produced to order and are therefore subject to a lead time, available on request.

Plain Tile Vents

An injection moulded ventilator which offers precision and strength. Suitable for all plain clay tiles to BS402 part 1 and roof pitches of 30° and above.

- UV acrylic paint finish to suit most colours
- 7.5kmm² ventilation area
- Moulded in 'High Impact Polystyrene'

PRODUCT CODE	DESCRIPTION
PTV/RED	INLINE PLAIN TILE VENT RED

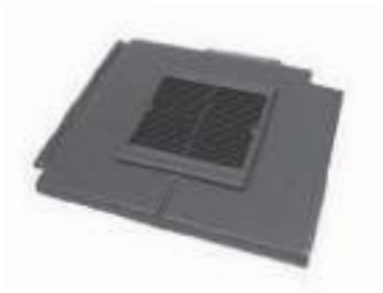

Universal Cowl Tile Vents

Moulded High Impact Polystyrene with UV stable paint to suit most colours. An unobtrusive design suitable for use with most manufacturers profiles, and has a patented 'anti-splash' sleeve device incorporating a 4mm fly-screen protection.

- Suitable for roof pitches of 15° and above
- Allows air to enter the roof space for cross flow ventilation
- Available as 10k or 20k cowl and new solar tiles

Lead Replacement

- Malleable, durable, waterproof and lightweight
- No special tools required - simply cut with a knife or scissors
- 20 years+ life expectancy
- Requires no additional adhesive or tape
- High performance adhesive for a permanent bond
- Resistant against corrosion and UV degradation
- Textured or smooth finish

20 Year Life Expectancy!

Lead R

A sheet aluminium alternative to traditional lead with a protective anti-corrosion coating and a high performance butyl adhesive underside. Zero resale value, eliminating theft and vandalism - a common issue with traditional lead roofing products.

Did you know?

Lead point of sale units are available for your branch, speak to your area sales manager for more information or contact us
Tel 0845 034 6008

Typical Applications:

- Abutments
- Chimneys
- Dormers
- Saddles
- Windows and rooflights
- Valley and gutters

Technical Data

- Surface finish: Corrugated or smooth
- Temperature resistance: -40°C / +90°C
- Minimum working temp: +5°C
- Life expectancy: Minimum 20 yrs
- Resistant against corrosion & UV degradation

Textured Lead Replacement

Lead R Textured

Our textured pattern provides excellent malleability and formability whilst maintaining long term durability and performance. 5m rolls available in widths: 150mm, 300mm, 450mm & 600mm

easy-trim[®] PolyureCoat

PolyureCoat

PolyureCoat is a liquid waterproofing membrane, formulated from a unique blend of moisture triggered polyurethane resin to produce a fast curing, seamless, tough and elastic waterproofing system. Highly durable and puncture resistant. Ideal for both new construction and refurbishment projects.

- Low odour system
- Suitable for applications on new, refurbishment projects and commercial roofs
- Seamless waterproofing system
- Applicable on existing bitumen felt, existing asphalt, concrete, GRP, Single ply (PVC) membranes and metal surfaces
- 10 Year Guarantee upto 20 Year Guarantee (with the Approved Contractor Scheme) - see page 8 for details

Quick Cure
water resistant
in 60 minutes*

Protection
against rust,
wear and
corrosion

Suitable
for use on
balconies and
walkways

Bonds & adheres
to all types
of substrates

Quick & easy
to apply

Suitable for
flat roofs

Resistance
to abrasion &
high elasticity

Accessories

- Trims & Lengths
Easy-Trim's wide range of flat roof trims, to be used alongside the PolyureCoat liquid waterproofing system. The range of trims complete the flat roof, giving a decorative edge and also ensuring the whole system is completely waterproof and durable.
- Reactivator
- Reinforcing Fleece
- Accelerator
- PolyureSeal

* See Technical Guidance on installation

easy-trim[®] PolyureCoat **APPROVED** CONTRACTOR SCHEME

What is the PolyureCoat Approved Contractor Scheme? A one day practical and written assessment with interactive roof models. Trainees will be assessed and are required to pass a final exam.

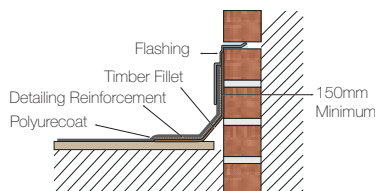

How much does it cost to join the Scheme? £150 per person. This will be refunded via product vouchers after 3 successful inspected installations. Classes are restricted to 8 participants.

What are the benefits of the PolyureCoat Approved Contractor Scheme? Easy-Trim will refer potential contracts for PolyureCoat applications. In addition to this, approved contractors will be listed on our national database and will receive a unique Approved Contractor Card plus a PolyureCoat Welcome Pack, access to excellent offers, quarterly newsletters and instant access to the Easy-Trim App.

Trims

Our wide range of flat roof trims, to be used alongside the PolyureCoat liquid waterproofing system. The range of trims complete the flat roof, colour matched to Polyurecoat giving a decorative edge and also ensuring the whole system is completely waterproof and durable. Trims can be used in conjunction with other products including GRP resin systems.

Gutter Drip External Corner

Gutter Drip External Corners are pre-formed corners that work in conjunction with Gutter Drip Trims. They are designed to allow rainwater to run off the roof into the gutter, also providing a neat and aesthetically pleasing finish to the perimeter of the roof. They are also available in a 2.5m length to edge the whole roof

PRODUCT CODE	DESCRIPTION
ET/POLYU/GD/E	GUTTER DRIP EXTERNAL CORNER
ET/POLYU/GD/2.5	GUTTER DRIP 2.5M LENGTH

2.5m lengths >

Water Stop Internal/External Corner

A pre-formed internal/external corner with its own water stop kerb to be used to direct water towards the gutter edge without need for mitring on site. Water Stop Trims are also available in a 2.5m length to edge the whole roof

PRODUCT CODE	DESCRIPTION
ET/POLYU/WS/I	WATER STOP INTERNAL CORNER
ET/POLYU/WS/E	WATER STOP EXTERNAL CORNER
ET/POLYU/WS/2.5	WATER STOP 2.5M LENGTH

Right or Left Hand Combi Corner

Designed to provide a weatherproof, decorative finish and strong clean lines to the roof edge, solving the problem of splitting and leaks at the roof edge.

PRODUCT CODE	DESCRIPTION
ET/POLYU/WS-GD	1 x RIGHT COMBI CORNER AND 1 x LEFT COMBI CORNER

Wall Termination Trim

Designed to fit into a chase in the brickwork and prevent water ingress.
Length: 2.5m

PRODUCT CODE	DESCRIPTION
ET/POLYU/WTT/2.5	WALL TERMINATION TRIM 2.5M

easy-trim[®] WeatherProofing

Fibapol

Fiba-Pol is a liquid roof repair coating that is moisture tolerant, cold applied, and reinforced with glass fibres. An effective and economical repair and waterproofing solution for damaged or leaking roofs and gutters.

Fiba-Pol provides instant repairs and waterproofing for a wide range of applications in exposed conditions. The product is impervious to water and will provide an effective barrier to the transmission of liquid water and water vapour, until such time full systems or longer term solutions can be implemented.

Available in 5kg and 20kg tin sizes.

Applications

- Felt, Mastic Asphalt & Mineral Finished Roofs
- Gutters, Lead Work & Flashing
- Pipe work and Drains
- Slates
- Metal
- Roof lights

Benefits

- Cost effective
- Can be applied in any weather conditions
- Can be applied at low temperatures
- Instantly seals a roof in one coat
- Can be applied in the damp
- Dries completely to allow light foot traffic (for cleaning windows etc)
- Made from elastomeric polymers that move with your building
- Dries in 2-4 hours
- Bonds to bitumen surfaces 5 x better than other similar products (due to Nano technology)
- Heat free and seamless application

easy-trim WeatherProofing

Bitumen Trowel

A compound of bitumen, solvents, mineral fibres and non-drying oils. Easy-Trim Bitumen Trowel Mastic is a plastic, non-slumping compound which provides an effective seal between most roofing materials. It is used for general waterproofing and sealing repairs; sealing cracks, holes and joints either as a finish or before the application of other materials and for remedial work before the application of Flashband.

Types of Application

- Filling cracks and fissures - in concrete, roofing felt, asphalt, lead, zinc, corrugated asbestos-cement, steel, masonry and renderings
- Joint-sealing in gutters, spouts, down-pipes, between corrugated asbestos-cement and iron sheetings, around skylights and pre-cast concrete units
- Bedding tiles, slates and flashings in position

Colour Black

Coverage 1kg will occupy approximately 660 cubic centimetres (1lb per 18.3 cubic inches)

Available in 5 Litre and 25 Litre tin sizes.

PRODUCT CODE	DESCRIPTION	BOX QTY	PALLET QTY
ETEP/TM/5	5LTR BITUMEN TROWEL MASTIC	4	144
ETEP/TM/25	25LTR BITUMEN TROWEL MASTIC	N/A	24

Cold Gritting Solution

Easy-Trim Cold Gritting Solution is a cold applied, ready to use and solvent based, bituminous adhesive. It conforms to the requirements of BS Code of Practice 144: Part 3.

It is designed to bond a wide variety of aggregates to built-up felt and mastic asphalt roof surfaces, providing a final solar reflective, weatherproof and damage resistant surface. The product is suitable for roofs with up to a 10° slope. Chippings compatible with Easy-Trim Cold Gritting Solution include:

- Limestone
- White Calcined Spar
- Gravel
- Granite
- Flint

Colour Black

Coverage Dependant on the size of chippings to be bonded:
3 - 9 mm (1.8m² per litre) **12mm** (1.3m² per litre)

Available in 25 Litre tin sizes.

PRODUCT CODE	DESCRIPTION	BOX QTY	PALLET QTY
ETEP/CS/25	25LTR COLD GRITTING SOLUTION	N/A	24

easy-trim WeatherProofing

Bitumen Paint

Easy-Trim Bitumen Paint is a fast drying, solvent based, full bodied bituminous paint to comply with British Standard 3416 : Type I and Type II. It provides an effective waterproof, weatherproof, corrosion resistant protective coating. It is resistant to low concentrations of alkalis and acids and can withstand prolonged oxidation. It is suitable for application to a wide variety of materials including iron and steel, lead, zinc, aluminium, asbestos-cement, concrete, stone and brick.

- Metal production - corrugated iron sheds, fire escapes, stairways, ladders, storage tanks, gutters, down-pipes, fences, railings, gates etc
- Protecting drinking water tanks
- A protective coating for concrete structures, stone, brick, concrete screeds and sand / cement surfaces

Colour Black, shiny coating when dry

Coverage Onto metal and smooth surfaces 10m²/litre (approx 490 sq.ft per imp.gallon)

Available in 5 Litre and 25 Litre tin sizes.

PRODUCT CODE	DESCRIPTION	BOX QTY	PALLET QTY
ETEP/BP/5	5LTR BITUMEN PAINT	4	144
ETEP/BP/25	25LTR BITUMEN PAINT	N/A	24

Bitumen Primer

A cold applied solvent based bituminous solution designed to penetrate and seal porous surfaces prior to the application of covering materials. Conforms to BS Code of Practice 144, Part 3.

Uses

Bitumen Primer seals porous substrates and encourages the adhesion of bituminous waterproofing systems and sheet coverings. It may be applied successfully to a wide range of surfaces:

- Concrete
- Asbestos cement
- Slate
- Metals - mild steel, zinc, lead
- Lightweight concrete screeds.

Colour Silver coating when dry

Coverage The application of BITUMEN PRIMER varies according to the porosity of the surface

Available in 5 Litre and 25 Litre tin sizes.

ETEP/BPR/25	25LTR BITUMEN PRIMER	N/A	24

easy-trim WeatherProofing

Felt Adhesive

Easy-Trim Felt Adhesive is a solvent based, high viscosity, bituminous adhesive with strong initial "grab" properties. It is a cold applied roofing adhesive formulated for convenience and safety, ensuring affinity and a strong, final bond to roofing felts. It is used for:

- Bonding all types of roofing felts to metal, timber and concrete
- Sealing roofing felt laps
- Bonding chippings to flat roofs

Colour Black

Coverage 2 sq.metres per litre (approx. 100 sq.ft. per imperial gallon)

Available in 5 Litre and 25 Litre tin sizes.

ETEP/FA/25	25LTR FELT ADHESIVE	N/A	24

Solar Reflective Paint

Easy-Trim Solar Reflective Paint is a solvent based bituminous coating, containing high quality leafing grade aluminium flake. It provides an excellent highly reflective bright silver coloured finish when dry, providing an effective waterproof and weatherproof protective coating, particularly where exposed bituminous, steel and corrugated iron surfaces are encountered.

Colour Silver coating when dry

Coverage 4-6m² / litre per coat depending on porosity of substrate
10m² / litre on non-porous surfaces

Available in 5 Litre and 25 Litre tin sizes.

PRODUCT CODE	DESCRIPTION	BOX QTY	PALLET QTY
EETP/SR/5	5LTR SOLAR REFLECTIVE PAINT	4	144
EETP/SR/25	25LTR SOLAR REFLECTIVE PAINT	N/A	24

All Weather Compound

Easy-Trim All Weather Compound is a heavy duty, solvent based bituminous roof coating, compounded with fillers and fibres. It is of a brushable consistency. It is an effective, general purpose roof coating. It is almost instantly rain resistant after application and is therefore particularly suited to winter use. Applied by brush or spray to waterproof and reseal many different types of roof covering, including:

- Asphalt roofs
- Concrete roof decks
- Slates & tiles
- Built-up felt roofs
- Asbestos cement sheeting
- Metal sheeting, including iron, steel, zinc & lead

Colour Black

Coverage 1.0 - 1.5 m² per litre per coat. Recommended two coat application.

Available in 5 Litre and 25 Litre tin sizes.

Maxi-Torch 3B Pour and Roll

Product Finishes

Sand Finish

- British Standard glass fibre based products
- Applied single-ply in certain systems

Typical specification

Maxi-Torch 3B is a waterproofing membrane, consisting of a glass fibre base coated with oxidised bitumen. It is sand finished on both surfaces. It is used as an economical underlay (or intermediate layer) in a built-up felt roofing specification, and usually fully bonded in hot bitumen. This product is also used as an underlay to bitumen shingles in a pitched roof application.

Roll weight: 40kg

Roll length: 20m

Roll width: 1m

PRODUCT CODE

ETMT/3B/SAND

DESCRIPTION

MAXI TORCH 3B POUR AND ROLL SANDED 1m x 20mtr

PALLET QTY

25

easy-trim Artificial Turf

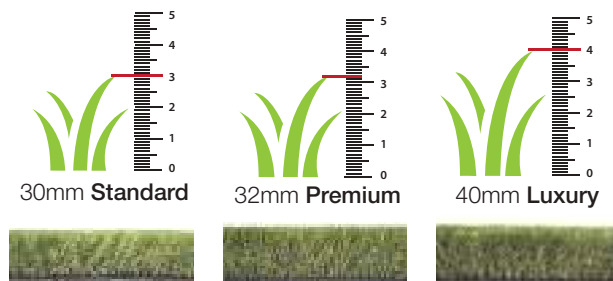

Artificial Turf

One of the latest trends quickly replacing natural grass, artificial grass allows for a more dynamic and easier way to maintain gardens and other outdoor areas. It requires very little attention and stays green all year round!

Luscious, dense, soft and tri-tone grass suitable for application in various situations it offers a realistic, aesthetically attractive appearance, touch and feel. Regardless of whether the outdoor area is well-used or purely for aesthetic purposes, artificial grass is ideal. For those who do not have any grass areas, then by using synthetic turf, these can be easily created adding a touch of greenery. Get the appearance of lush green grass without the hassle, it is completely maintenance free as there is no need to mow it or water it!

Available in 3 lengths:

The benefits at a glance

- 10 year warranty
- 100% pet and child friendly
- Low maintenance
- Hard Wearing
- Durable
- Fully porous, meaning water will not collect on the surface
- Available in full rolls or cut sizes

PRODUCT CODE	DESCRIPTION
ET/EG/30/PRE	EASY-TRIM PREMIUM 30MM GRASS
ET/EG/32/PRE	EASY-TRIM PREMIUM 32MM GRASS
ET/EG/40/PRE	EASY-TRIM PREMIUM 40MM GRASS

Accessories

Turf-Fix

A single part adhesive for bonding the grass to hard surfaces.

- Simple one coat application
- Bonds well in wet or dry conditions
- Use to seam joints on artificial lawns
- Bonds to most substrates

PRODUCT CODE	DESCRIPTION
ET/EG/ADH/C	310ML ADHESIVE CARTRIDGE (3M COVERAGE)

Turf-Tape

A 2-component polyurethane seam jointing adhesive for artificial grass, sport & play surfaces

- Easy application
- Bonds well in wet or dry conditions
- Use to join artificial grass together

PRODUCT CODE	DESCRIPTION
ET/EG/TAPE	EASY-TRIM SEAMING TAPE (PER MTR)
ET/MEMBRANE	WEED SURPRESSANT MEMBRANE (2M x 25M)

ETR4

Centre pivot roof window in PVC or timber with or without electric radio control.
Usage: from 15° to 90°

The benefits at a glance

- Centre-pivot opening
- Perfect alternative to place above ETR7 windows
- Low emissivity double glazing
- Optional thermal insulation system pre-fitted
- Reserved for spaces that are difficult to access
- More safety for you: No mistakes, no stress and time-saving - thanks to the clever push-fit system with audible click feedback
- Drive and control technology as standard: Convenient control in non-reachable areas
- Excellent prospects for you and your customers: German made Easy-Trim Roto quality – with a 15-year warranty
- Available in timber, painted timber and PVC

ETR6

Centre pivot roof window in PVC or timber with insulation collar.
Usage: from 15° to 90°

The benefits at a glance

- Extensive preassembly at the factory means faster installation
- Outstanding energy efficiency through integrated thermal insulation collar and triple insulating glazing: Roto blueTecPlus UW 0.80 W/m²K
- Professional installation with clear time savings thanks to Easy-Trim Roto closure systems

ETR7

Top-third pivot roof window in PVC or timber.
Usage: from 20° to 65°

The benefits at a glance

- Top-third opening
- Single handled operation at the bottom
- Low emissivity double glazing
- No obstructive sash and comfortable view
- Optional thermal insulation system pre-fitted
- Available in timber, painted timber and PVC

ETR8

Top-hung roof window in PVC or timber with insulation collar.
Usage: from 20° to 65°

The benefits at a glance

- Low emissivity double or triple glazing
- Easy and quick to fit, supplied fully assembled
- Panoramic unobstructed view and maximum headroom: maximum outward stepless opening of 45° hinged at the top of the window and at the convenience of the user
- **More energy savings:** Vapour barrier and pre-fitted insulation collar as standard for high thermal insulation and better air permeability
- **Easy handling:** One handle at the bottom of the sash for all functions (opening, ventilation and cleaning)
- **Security:** Four point central locking system and cleaning position locked to secure maintenance

Why not upgrade?

You can upgrade to the ETR8; intelligent motion fully electrical top pivot window with insulation collar

A wide selection of accessories (including blinds) are also available - please ask for details

Additional Support

We appreciate that the roofing and construction industry can sometimes be complex but rest assured we are here to help. At Easy-Trim, we pride ourselves on our excellent customer service and technical advice which is available to support and guide you with any queries you may have, be that at the point of placing your order or during on-site installations.

We have a wealth of technical expertise and knowledge of the industry and products used day to day by all.

Across the whole of the Easy-Trim product range we provide comprehensive technical advice and support for our product applications to both specifiers and customers. We also offer technical training for some products via our approved contractor courses at our own training facilities in Rugby and Altham.

Wherever necessary we can assist with product selection advice, installation guidance and are happy to attend onsite where required.

Delivery

Easy-Trim take great pride in the products we offer and how we present and deliver them to all our customers. We understand that our customers expect products to arrive on-time and in perfect condition, and we aim to meet those expectations with every delivery. Our dedicated distribution team take great care to collate and package your order and Easy-Trim has its own fleet of vehicles dedicated to providing our customers with the level of service they deserve and have come to expect.

Our Responsibility

Easy-Trim is committed to minimise the impact of its activities on the environment and helping preserve our environment for future generations. Our environmental policy sets out how we aim to protect the environment and prevent the possibility of pollution. This process forms an integral part of every decision we make.

Whenever possible we aim to source our raw materials and packaging from the UK. Our packaging solutions have been overhauled to reduce the packaged volumes and our packaging materials are sourced locally and utilise Forest Stewardship council (FSC) 70 Mix Cardboard.

Waste PVC generated from within our manufacturing facilities is 100% recycled and converted into pelletised raw material at Easy-Trim EcoVyn, thereby avoiding landfill and any adverse environmental impact.

We provide clear information regarding the environmental impact of all our products on the Technical and Material Safety Data Sheets.
